Vaibhav Paliwal

Software Test Engineer (ETL & QA)

Email: Vaibhavpaliwal422@gmail.com | **Phone:** +91 7877716299

GitHub: github.com/Vaibhav7877 | **LinkedIn:** linkedin.com/in/vaibhav-paliwal

Location: Jaipur, Rajasthan | **Total Experience:** 3+ Years | **Notice Period:** 3 Months (Negotiable)

PROFESSIONAL SUMMARY

Software Test Engineer specializing in ETL & QA with 3+ years of expertise validating large-scale data pipelines, enterprise data warehouse migrations, and Automobile & Telecom systems across Oracle, SQL Server, and PostgreSQL. Skilled in end-to-end ETL validation, source-to-target mapping, data reconciliation, defect management, and regression testing, with strong knowledge of Agile/Scrum delivery and cross-functional collaboration. Also exploring AI-driven automation and agentic workflows, with hands-on exposure to n8n, Zapier, RAG systems, and generative AI platforms including Anthropic Claude and OpenAI.

KEY HIGHLIGHTS

- Delivered 3+ years of hands-on ETL/QA testing across 2 enterprise data warehouse and telecom migration projects.
- Tested and validated systems across 5 database ecosystems: Oracle, Teradata, Greenplum, SQL Server, and PostgreSQL.
- Validated incremental daily loads of millions of records as part of a 12-member team, across tables with 100+ crore (1B+) rows, catching and resolving data mismatches before they reached production.

EXPERIENCE

InfoObjects Software Pvt. Ltd. | Nov 2022 - Present

Sr. ETL Test Analyst

Project 1: Enterprise Reporting - SQL Server to PostgreSQL Migration

- Tested ETL workflows and warehouse pipelines feeding daily business reporting, identifying data quality issues before they reached downstream teams.
- Performed end-to-end validation for the SQL Server to Greenplum PostgreSQL migration: reconciled records, verified transformation logic, and benchmarked performance to achieve zero-downtime cutover.
- Wrote SQL queries to detect data mismatches and rule violations, scoped in-migration tables, and flagged risk areas during release planning.
- Maintained up-to-date documentation of test steps and known issues to preserve team context across releases.

Project 2: Frontier Communication - Oracle to Teradata Migration

- Validated historical, initial, incremental, and daily ETL loads from Oracle and flat-file sources into Teradata, confirming alignment with the target data models.
- Built reusable SQL scripts to detect reconciliation gaps across large datasets, reducing manual spot-checking effort.
- Led walkthroughs with QA and development teams to flag issues early, and drove daily stand-ups to keep blockers visible.
- Created test scenarios and a Requirements Traceability Matrix (RTM) to ensure full coverage of business rules.

Key Responsibilities

- Analyzed BRDs and source-to-target mappings to define test scope per track, and documented it for repeatable, hand-off-ready execution.
- Participated in Agile ceremonies, triaged defects, and performed root-cause analysis on critical issues.
- Conducted UAT and post-deployment verification to ensure live subscribers were unaffected.
- Executed SIT, regression, and smoke tests across web and client-server environments, logged defects in JIRA, and reported status to stakeholders.

SKILLS

Technical Skills: ETL & Data Warehousing, Star/Snowflake Schema, Data Profiling & Cleansing, Source-to-Target Mapping, SQL & Databases, Fact & SCD Dimension Tables, Database Migration, Data Integration, Data Quality Assurance, GUI & Functional Testing, Automation with Python/Shell Script, UAT & SIT, Defect Management, Negative & Regression Testing, Test Strategy & Test Planning, SDLC, STLC & DSLC, Agile/Scrum, ER Reporting & BI

Tools & Platforms: Oracle, PostgreSQL, Greenplum, SQL Server, MySQL, Teradata, Informatica, SSMS, DbVisualizer, DBeaver, Data Validator, Excel Compare, Eclipse, Visual Studio, IntelliJ, Git, GitHub, Jira, Confluence, TFS

Domain: Automobile & Telecom

AI & Automation: Generative AI (Anthropic Claude, OpenAI/GPT), AI Agents, RAG (Retrieval-Augmented Generation), Workflow Automation (n8n, Zapier)

CERTIFICATIONS

- **Anthropic:** AI Fluency Framework & Foundations; AI Capabilities and Limitations; Claude Code 101 (2026)
- **Scaler:** Beginner Python; Advanced DSA – Foundations (2026)

EDUCATION

BCA (Bachelor of Computer Applications) | JNU, Jaipur | 2022

LANGUAGES

Hindi - Native or Bilingual Proficiency **English** - Full Professional Proficiency
